DETAILED ACTION

Priority

1. Applicant is reminded that in order for a patent issuing on the instant application to obtain the benefit of priority based on priority papers filed in parent Application No. 10/289,786 under 35 U.S.C. 119(a)-(d) or (f), a claim for such foreign priority must be made in this application. In making such claim, applicant may simply identify the application containing the priority papers.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 6, 7, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen (US 5,739,964).

Allen has a system for magnification correction as shown in Figs. 7A,7B in which a light source 110 and magnification adjustment optics 710 and 720 are used to correct the magnification of a pattern in one direction. Optics 710 comprise cylindrical lens near the object plane. Column 15, line 49 states that the correction system may be used with telecentric systems.

Allowable Subject Matter

4. Claims 2 – 5, 8, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose the magnification adjustment system as claimed having lenses having the particular shape claimed and having the optical power as claimed.
